## Factory-Certified Refurbished Machines

### Step 1: Incoming Cleaning and Assessment

Once a machine arrives in our Rebuild Center, we conduct a thorough cleaning and evaluate the condition of all components.

### Step 2: Assembly and Repairs

Factory-trained technicians assemble the machines and make repairs using genuine IMA and Schelling replacement parts.

### Step 3: Restoration to Original Factory Specifications

The machine is restored to its original appearance and performance capability. Equipment is calibrated and thoroughly tested to ensure full functionality to original factory specifications.

### Step 4: Certification and Warranty

Every IMA Schelling USA factory-certified refurbished machine comes with a six-month warranty.
